Dear Valued Customer,

Re: United Kingdom Exit from the European Union

Eaton has a team that is proactively monitoring and assessing the UK Government negotiation, European institutions and the possible implications that Brexit might have on Eaton's business in relation to our employees, trade, and other areas including legislation.

Based upon the information that is available, and the decisions that have been made thus far by the UK Government and the EU, at this time, Eaton has no plans in place to change where or the manner in which Eaton operates. Eaton will continue to monitor the situation and analyze the Brexit negotiations as information is made available.

Eaton's focus and priority right now is to continue to provide excellent customer service and support to not only Eaton's UK based customers but also to Eaton's customers and export markets based outside of the UK, across all Eaton businesses.

Eaton will naturally keep you informed if any there are any changes that might impact our business relationship.

Yours faithfully

For and on behalf of Eaton

Paul Hartley

Global Product Line Manager, MTL
